

MEDLINE®

Doing our part ... to help you make yours **cleaner.**

Medically compliant auxiliary equipment

Navigating the highly regulated world of medical manufacturing and cleanroom operations can be a daunting, time-consuming task. Mistakes can result in delayed start-up, lost production, quarantined parts, rework and lack of process validation.

Until now, locating equipment suitable for medical cleanroom applications has been difficult and the specification burden has fallen on the buyer, adding time and cost to the implementation and certification process. Not anymore...

Conair MedLine equipment **eliminates the hassles**, headaches and complexity from your next medical plastics equipment purchase.

From dryers to blenders to post-extrusion equipment, and everything in between, **MedLine auxiliaries are aligned** with even the most stringent ISO and FDA standards.

Introducing MedLine®

Auxiliary equipment specifically designed to support the medical plastics manufacturing industry.

MedLine products are manufactured and sold by Conair, the world leader in auxiliary equipment. They are specifically designed for use in the **highly regulated production** of medical products. Conair's MedLine products are **ready-made** for the 'white room' and other cleanroom environments that are common in the medical industry, and are aligned with the **regulatory requirements** of ISO, FDA and ICH.

A wide range of MedLine products have been developed to support:

- ▶ Injection Molding
- ▶ Extrusion
- ▶ Injection Blow Molding
- ▶ Plastic Packaging Operations

► **The right equipment**

Its not just auxiliary equipment; it's Conair MedLine equipment, purpose-built for medical manufacturing and compliant with medical manufacturing regulations.

► **The right compliance**

Materials of construction are selected to be suitable for white rooms, ISO 14644 Class 7 and Class 8 cleanrooms, and hybrid environments. Particulate generation and exhausts are minimized or eliminated. Metals are electro-polished, anodized, and/or powder-coated white.

► **Simplified implementation**

MedLine equipment is factory calibrated (with certificate). ISO-conforming documentation supports proper installation and maintenance, simplifying compliance auditing and mitigating risk.

► **Traceable compliance**

All MedLine product documents, along with revision controls, are stored for easy access at any time.

MedLine Peace of Mind

What Conair offers the medical plastics industry is peace-of-mind. When you select a piece equipment with a MedLine label, you can be sure it meets the requirements necessary for compliance with the following standards; ISO 14644, ISO 9001, ISO 13485, FDA 21CFR, ICH 7a.

By adding features and capabilities in alignment with these standards across all of our auxiliary equipment platforms, Conair becomes the only auxiliary equipment supplier able to offer its customers this comprehensive range of medically compliant auxiliary equipment.

Conair medical manufacturing professionals have decades of experience and can provide the best, most compliant equipment for medical manufacturing. Not only can they help you select equipment to meet your needs, they can also provide invaluable advice for cleanroom site preparation and regulations.
