

Conair Preventive Maintenance Program

AN OUNCE OF PREVENTION

Your Conair equipment is well known for productivity and reliability, but like any high-performance machinery, it needs to be well-maintained to continue operating at peak efficiency. A thorough and consistent preventive maintenance program, however, can be difficult to organize... and even harder to stick to over time. So, why not let the Conair Service Department take care of it? By implementing a Conair PM Program, you can:

- **Prevent costly downtime** by ensuring everything is working within expected parameters.
- **Save money** on spare parts and take advantage of lower rates for scheduled service.
- **Extend equipment lifespan** with consistent upgrades and provide a documented service history.

General Program Scope

- Equipment review: check control, mechanical and electrical components for integrity.
- Safety inspection to ensure conformity with Conair safety standards.
- Any operational issues are immediately brought to your attention along with recommended correction steps.
- A written service report is provided.

Aftermarket Services

EXPERIENCE THE CONAIR DIFFERENCE

Always Available

Whenever you have a problem with plant equipment, all you really want is a fast, competent response from your supplier. That's exactly what you can expect from the Conair aftermarket team. Count on us for:

- **24-Hour Telephone Support.** Call our Instant Access hotline anytime, day or night, and you'll be connected immediately to an experienced and knowledgeable technician who will make it his mission to solve your problem.
- **On-Call Field Service.** Across the country and around the world, Conair customers are supported by one of the largest and most experienced field-service teams, ready to provide on-site troubleshooting and equipment repair.
- **Same Day Parts.** The Instant Access number is your round-the-clock connection to our vast spare parts inventory and specialists who handle over 12,000 requests each month and ship 85% of them within 24 hours.

Partners in Profitability

While it may be impossible to avoid equipment downtime and emergency repairs entirely, the Conair aftermarket team can help you put plans and a program in place to minimize the impact of these situations.

- **Preventive Maintenance.** The Conair Preventive Maintenance Program can be customized to your needs, preventing costly downtime, saving you money and extending your equipment lifespan.
- **Training.** Educated employees are key to productivity and profitability. That's why we offer training on the proper operation and maintenance of all of Conair equipment. All training sessions are tailored to your particular requirements and conducted in your plant or at our facility.
- **Equipment Calibration.** Maintain your equipment's precision and productivity with regular in-plant inspections to confirm it is set-up and operating correctly and safely. All instruments are maintained to industry standards and traceable to protect your ISO/TS certification.

Nobody supports you like Conair does. **Our Aftermarket Team is committed** to keeping you up and running, productive and profitable for as long as you own your Conair equipment.
