

SIMPLIFY CONVEYING SYSTEM DUST CONTROL

Cyclone Dust Collector

Removes up to 90% of dust before it reaches the filter

- Filterless, sealed cyclone is installed in front of system dust collector
- Reduces dust collector filter service and extends filter life
- Cyclone includes no moving parts, no filter
- Free standing frame allows easy placement close to, or away from pump/dust collector
- No utilities required
- Inlet and outlet connections are modular, allowing a range of pump and tubing sizes to be connected
- Service consists of periodic draining of the dust collection bucket

Call today to learn how the Cyclone Dust Collector can simplify filter maintenance.
