18188902	W5000	1818890201	32.25"	15.75"

Note: Dryers built before June of 2007 require the entire wheel assembly to be replaced in order to replace a desiccant wheel. The wheel assembly includes the desiccant wheel, upper and lower plenums, belt and drive motor. In June of 2007, Conair made a design improvement to the desiccant wheel assembly which allows for the desiccant wheel to be replaced without replacing the entire assembly.

All new dryer wheel assemblies shipped as replacements allow for removal of the wheel from the assembly. Contact our Parts Department with your dryer serial number to verify if your dryer has the old wheel assembly design, or the new style.

Desiccant Wheels
