

SmartServices® NEW FEATURES

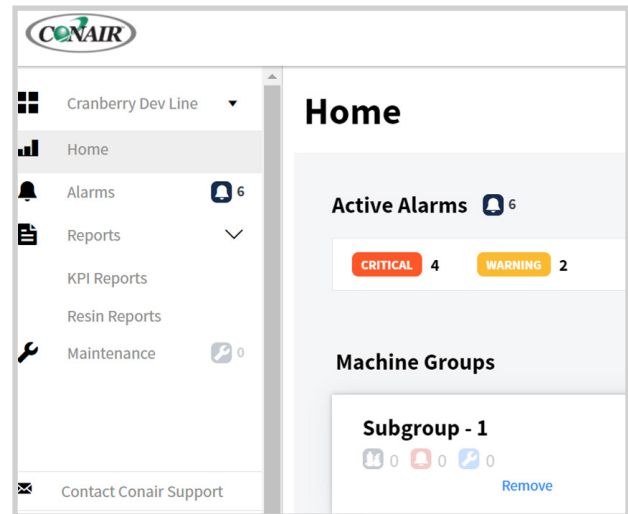

We're always improving and adding features to SmartServices. If there's an improvement or feature you'd like to see on the Dashboard, please let us know by emailing info@conairgroup.com.

NOW INTRODUCING: REPORT SHARING!

SmartServices offers a couple of on-demand report types: KPI Reports and Resin Reports. Users can go into the Reports section and create one of these reports by requesting an instant report or scheduling a recurring report.

However, in both cases, the user is the only person who will receive the report. What if a user creates a report and wants to share it with other coworkers?

Update Resin Report

Select frequency:

Run report by:

Report Name:

Group data by:

Select blenders:

Recipients:

How It Works:

- Users can add a list of email addresses when they create / update a recurring/periodic report.
- That list can be updated from the reports section for each individual report.
- All the people in the email recipient list will receive the report(s) in the email provided.
- This covers Resin Reports as well as KPI Reports.
